## Point of Sale Software Solution

Finally, a retail Point of Sale software package to get excited about...

SIMMS POS (Point of Sale) software takes cash register automation to a whole new level. Imagine tracking customer purchases and habits, gift card management, administration, charge account management, shelf printing included in one seamless integrated solution. Imagine powerful accounting capabilities, enhanced inventory control, polling/file transfers, space management all being offered in one system. Imagine no more.

SIMMS POS is a full featured Point of Sale software solution that seamlessly integrates with the rest of the SIMMS modular package while combining functionality and information for more effective cash management. Easy to use, information is displayed in a familiar Windows graphical format, known for its incredible flexibility. SIMMS POS provides a true small to large-market retail business system that is designed from the ground up to be a complete retail business management solution.

The future of 3rd-party, fragmented software applications is dead.

Messy interfaces and multiple databases will be a thing of the past. Accessing more than one application for information will be no longer. Created for both today, and tomorrow's retail environment, the SIMMS POS offers you the cutting edge technology, the seamless integration that will lead your business into the future.

A POS software solution that promotes growth.

Breakthrough functionality makes SIMMS POS easy to setup, manage and process sales transactions for any retail business. At last, a solution that gives you the time to focus on enhancing your customer's shopping experience, which grows as your company grows and that gives you the tools needed to increase sales and gain greater profitability. It is a perfect fit for single store or multiple retail outlets and will automate your business quickly and easily, making the task of daily inventory of goods and managing customers and vendors a snap.
