QUICKBOOKS EXPORT MODULE

SIMMS Software QuickBooks Module

The fastest, easiest way for you to share information between SIMMS and QuickBooks®.

Run your computer services business more efficiently with SIMMS Inventory Software and the SIMMS QuickBooks link designed to simplify routine business, accounting and financial management tasks bringing SIMMS and QuickBooks into sync with each other.

With the SIMMS Inventory Software QuickBooks Link, you only need to enter data once and it will appear in both SIMMS and QuickBooks. This feature not only saves you the time of manually entering data, but it also minimizes the problems of duplicate, redundant and wrong data common to manual data entry. Now you can synchronize your data between SIMMS Inventory Software and QuickBooks and ensure data accuracy, enhance your flexibility, and increase your control over your bottom line.

Customers - Import all your SIMMS Inventory Software Customers into QuickBooks. Changes made to SIMMS Customers can be synchronized with QuickBooks. Import and/or update all of your defined SIMMS Inventory Software Customer Types into QuickBooks. Easily pick and choose what SIMMS customers you wish to update into QuickBooks.

Vendors - Import all your SIMMS Inventory Software Vendors into QuickBooks. Changes made to SIMMS Vendors can be synchronized with QuickBooks. Import and/or update all of your defined SIMMS Inventory Software Vendor Types into QuickBooks. Easily pick and choose what SIMMS Vendors you wish to update into QuickBooks. Send and receive updates for selected Vendors.

Items - Import any/all of the following SIMMS Items into QuickBooks.

SIMMS Inventory Software's QuickBooks Link features:

Taxes - Import and/or update all of your defined SIMMS Inventory Software Tax Codes and Groups into QuickBooks.

Miscellaneous Charges-> Service Items in QuickBooks
Inventory Items -> Inventory Parts in QuickBooks
Misc. Items -> Non-Inventory Parts in QuickBooks

Invoices - Generate QuickBooks invoices based on invoices entered in SIMMS Inventory Software. Create a QuickBooks invoice automatically from invoices created in SIMMS. You have the freedom to pick and choose transactions to include in the synchronization.

Changes made to SIMMS Inventory Software Items can be synchronized with QuickBooks. Create a new Item in QuickBooks based on a selected SIMMS Item. Easily update your item code, item description, sales price, purchase cost, default Vendor, reorder point and of course your on hand quantity from SIMMS Inventory Software to QuickBooks. Send updates from SIMMS Inventory Software to QuickBooks for selected Items.

Receipts - Generate QuickBooks bills based on receipts of goods entered in SIMMS Inventory Software. Create a QuickBooks bill automatically from receipts created in SIMMS, and enjoy the freedom to pick and choose transactions to include.

Details

- Synchronize your Item prices from SIMMS to QuickBooks assuring all products/parts charges you enter will have the most up to date price.
- No import or export of IIF files is required to move data in and out.
- A registered copy of the US version of QuickBooks 2007 Premier Edition is supported. **Note:** It is important to ensure your version of QuickBooks is an updated version.
